

- School's Name is Ihifix International Schools
- Ihifix is located 41 Jabi Road, Kaduna State, Nigeria.
- Ihifix was founded in: 2020
- About us: Ihifix International School is a visionary educational institution redefining what schooling means in the 21st century. We are Nigeria's first fully tech-integrated primary and secondary school, born from a mission to bridge the digital divide and empower the next generation. As part of the broader Ihifix movement (a triple-helix organization combining industry, academia, and foundation efforts), our school is more than a place of learning, it's a living laboratory of innovation and character development. We pride ourselves on nurturing innovative thinkers, problem-solvers, and ethical leaders who will shape the future of Nigeria and the world.
- Our school's motto is 'It's possible'
- Our vision is to unlock the potential of every child and shape a new generation of African leaders, innovators, and changemakers. We envision a future where our graduates drive progress in their communities and confidently navigate a globally connected, digital world.
- Our Mission is to Equip learners with future-focused skills, values, and a global mindset by providing holistic education that blends functional knowledge, in-demand tech skills, and solution-based thinking. We strive to provide every Ihifix student with the knowledge, skills, and mindset to excel in a fast-changing world – and to do so with integrity, creativity, and purpose.
- Our Curriculum Type We blend the British Curriculum standards with innovative STEM and life-skills programs, creating a learning experience that is both academically rigorous and future-focused. Our pupils don't just learn about technology; they learn through technology. Every classroom is equipped with modern devices and high-speed internet,

enabling interactive lessons in which students might program a robot to solve a math puzzle, or use a tablet app to simulate a science experiment. Each student has their own laptop (meeting our required specs) to work on projects, practice coding, and conduct research under guided supervision.

- We follow an enhanced British curriculum adapted for Nigeria and enriched with STEM and entrepreneurship content. This means your child learns the same core subjects and competencies as students in top international schools worldwide, with the added benefit of our tech and innovation programs. We are fully registered with the appropriate educational authorities in Nigeria, and we align with international standards. As our students reach key stages, they will be prepared to sit for external examinations like Cambridge Checkpoint, IGCSE, or WAEC/NECO ensuring their education is recognized both locally and globally. Our curriculum is regularly reviewed and accredited by educational quality bodies to maintain the highest standard.
- We currently admit students from in Grade 1 (the start of primary school) up through Junior Secondary grades. As a growing institution, we are adding higher grades each year, and our vision is to become a full primary-through-secondary school. If your child is transferring from another school, we can assess placement into the appropriate grade based on academic background.
- Our teaching method is a triple-helix model, which is a powerful synergy of Industry, Academia, and Foundation. This unique approach gives your child distinct advantages: As an Ihifix student, your child is not learning in isolation. The school arm works closely with the consultancy arm of the organisation, other leading tech companies, and industry experts to teach tech classes and keep our curriculum cutting-edge. Our teachers are continuously trained in the latest pedagogies and tech tools, ensuring every lesson is impactful. We follow a robust British-based curriculum complemented by local relevance, so students gain both internationally benchmarked knowledge and cultural grounding.. We instill in children a heart for service and leadership through community projects and outreach initiatives supported by the foundation. Whether it's coding workshops for less privileged youth or environmental clean-up campaigns, our students learn the importance of giving back.
- Technology at Ihifix is an everyday tool, not an occasional treat. In every class, students and teachers leverage tech to enhance learning, from interactive lessons on digital whiteboards to research on tablets. Starting in lower primary, children use age-appropriate educational apps and games that make learning interactive. By upper primary and secondary, students are regularly programming, building robots, creating presentations, and collaborating through online platforms under teacher guidance. We have a one-to-one laptop program for students as they grow (with proper supervision and internet safety controls in place). Importantly, we teach digital literacy and responsibility alongside tech skills so students learn not just to consume technology, but

to create with it in a safe and ethical manner.

- Teacher-to-Student Ratio at ihifix one to five
- Extracurricular Activities at ihifix We offer a rich extracurricular program to ensure students develop talents and interests beyond the classroom. For sports and fitness, students can participate in football (soccer), basketball, and athletics (track and field). We also have mind building games such as Chess, Monopoly and Scrabble. Our aim is to provide a balanced array of activities: some that sharpen the mind, some that exercise the body, and some that nurture creativity. These activities usually occur after school or during designated club times, and we encourage every student to get involved in at least one club or sport. Participation builds teamwork, discipline, and time management skills – plus, it's a lot of fun and a great way to make friends.
- Student Support Services include Mentorship from Tech experts from Ihifix Academy
- Admission Process at ihifix Our admissions process is straightforward, transparent, and personalized. We want to ensure that our school is the right fit for your child and that you have all the information you need along the way.
- We admit students into various entry points from primary through secondary, and we embrace diversity in our student body.
- Entry Requirements: minimum of second class upper from a recognised University
- Age / Grade Eligibility: must be five years old, We currently offer admission into Primary classes (typically Grade 1 through Grade 6) and Junior Secondary (Grade 7 and upward as we grow). Whether your child is just starting primary school or you are looking to transfer them in at a higher grade, we have entry points at key stages.
- School Fees / Tuition at ihifix is three million naira
- For scholarships. Yes, we do. Through the Ihifix Foundation, we are proud to offer a limited number of scholarships each year. These are awarded based on merit (academic excellence or special talents in areas like coding, science, or leadership) and/or financial need. We believe that deserving students should not be held back due to finances. The scholarship program may cover a portion or, in exceptional cases, the entirety of tuition and fees. To apply, families will need to fill out a scholarship application and potentially have the student undergo additional testing or interviews. We also occasionally have corporate-sponsored scholarships or competitions that grant awards to top performers. Additionally, for families not on scholarship but who need flexibility, we offer installment

payment plans and sibling discounts to make our fees more accessible.

- **Health & Wellness** The safety of your child is our top priority. We have put comprehensive measures in place to create a secure and nurturing environment. Physically, our campus is secure. A professional security team monitors the gates, and visitors are screened. We have CCTV surveillance in key areas, and all staff are trained in student safety and emergency protocols. We conduct regular drills for fire and other emergencies so everyone knows what to do in case of an incident. On the health side, we maintain a clean campus, and a qualified nurse is on site to handle any health issues or first aid. But safety is not just physical; it's emotional and psychological too. We enforce a strict anti-bullying policy. Teachers are vigilant and approachable, so if any child feels uneasy, they have trusted adults to turn to. We also offer counseling services: our guidance counselor checks in on students' emotional well-being and conducts sessions on topics like friendship, stress management, and online safety.
- **Emergency Procedures:** We have a Laban
- **Communication Channels** are through news letters and PTA meetings
- **Parent Involvement Opportunities:**
- **Community Engagement & Partnerships:**
- **Teacher's Qualification:** Our teachers are the heart of Ihifix, and we have carefully selected a team of passionate, highly qualified educators. Each teacher holds relevant teaching certifications and degrees in their subject areas, often with specialized training in STEM or international curricula. Beyond paper qualifications, they are innovators in the classroom, early adopters of new teaching methods and technology tools. We invest heavily in continuous professional development: our teachers regularly attend workshops, training (sometimes with our industry partners), and international conferences to stay at the forefront of education. Just as importantly, they love what they do.
- Classrooms at ihifix are twenty in number
- There are three laboratories at Ihifix
- We have one library at Ihifix
- For Sports Facilities, we have a football field
- What makes this school unique compared to others: Ihifix is not just another school – it's a trailblazer in education. We are the first in Africa to fully integrate technology and innovation into a primary/secondary curriculum. Our unique triple-helix model (linking industry partnerships, academic excellence, and a social impact foundation) means your

child's learning is connected directly to the real world. They gain cutting-edge tech skills, mentorship from experts, and opportunities to lead community projects, which are experiences most schools simply don't offer. In short, we combine world-class academics, 21st-century skills, and character-building in one program. If you want your child to be future-ready and not just book-smart, Ihifix stands out as the obvious choice
